## Working together creates Successful Partnerships

Throughout the school year the Worth Restaurant opened their doors in the evening to offer programs for youth and teens. By partnering with the successful teen programming at the Worth Library, they were able to acquire a new client base for operations while offering a safe activity in town for youth. The EDC will assist you in setting up an activity at your business. Please contact us if you are interested in partnering with others in the community. Perhaps you can offer a service at another location? Advertise at your neighbors' location, reach out to something similar to you and try new things. We are willing to help you!
